Impact of Medical Missions Foundation

Medical Missions Foundation provides surgical and medical care in underserved communities throughout the world and to positively impact the lives of children and their families. Our surgical missions are primarily staffed by local Kansas City volunteer doctors, nurses, and other volunteers.

9 out of 10 people in the countries we serve cannot access even the most basic surgical services. Your financial support provides the logistical foundation for these missions, supplementing donated time and supplies to provide a broad range of high-quality services in a cost-effective way. Your sponsorship of this event will allow medical experts to utilize their skills and abilities to provide hope and significant strides toward a healthier future for children and families around the world. Please join us!
